X-TERRAVERSE
project

Index

Genesis

X-Terra, an exoplanet discovered 1000 years ago by the XR-Pioneer probe that was intended for space exploration. It has been built by the AlphaTech Corporation, which was the leading company present on Earth before the big flare. During these times they did act as a lifeline and gave a new hope to the humanity.

Thanks to the help of the probe, a planet extremely similar to the Earth has been discovered and several expeditions have been concluded before starting the colonization.

The basic resources that the planet offered were unlimited and the planetary scanner had also discovered that the composition of the rocks were containing a high percentage of precious minerals, leading the company to opt for X-Terra rather than other planets.

Genesis

Several humans left the Earth to populate their new home and to ensure a continuation of the humankind, while a large part of them decided to stay due to various circumstances: attachments, lack of self-esteem, disbelief, or fear of the unknown.
Once established on the new planet, everything proceeded perfectly with the help of the XR-Droids - the support automatons intended for the construction of infrastructures and the protection of humans from unknown dangers.
Their help was of primary importance to the colonists, who were able to rebuild and proceed with their lives as on Earth.

This is the XR-Pioneer probe built in the year 2404 by AlphaTech Corporation

Vision

«The X-Terraverse project aims to merge the digital NFT with the physical world, with the addition of an engaging experience through a sci-fi NFT-based videogame»

Introduction

In a groundbreaking fusion of digital innovation and physical collectibles, the X-Terraverse project emerges as a pioneering endeavor poised to redefine the gaming landscape. By seamlessly blending Non-Fungible Tokens (NFTs) with gaming, X-Terraverse project introduces an experience set to captivate enthusiasts worldwide.

The game will be characterized by a 2D top-down survival farming game set on the mysterious X-Terra planet. It will combine sci-fi RPG, farming, survival, and management elements.

The primary characters of the game will be the X-Terra Citizens NFTs, while the XR-Droids NFTs will play a secondary role as automatons designed for exploration and resource gathering. Inside the game it will be also included the XR-Droids Survival mini-game, accessible via an in-game terminal. This experience will unlock access to exclusive realms teeming with opportunities for adventure and conquest.
Moreover, XR-Droids transcends traditional collecting paradigms with its innovative "phygital" approach, seamlessly integrating physical collectibles with digital assets. Through this novel convergence, XR-Droids amplifies the intrinsic value of NFTs.

Join us as we embark on an unprecedented journey where the boundaries between the digital and physical worlds blur, and the possibilities are limitless. Welcome to X-Terra, where the adventure begins, and the future of gaming unfolds.

Context | X-Terraverse

The main project objective is to bring a MMORPG 2D top-down sci-fi farming game set on the enigmatic X-Terra planet. In this immersive experience, players will be engaged in mining and resource gathering, combat alien threats, complete quests, plant seeds, and cultivate crops. Additionally, players will be able to forge meaningful relationships with fellow colonists. The game will be distinguished by its unique alien vegetation, futuristic architecture, and richly detailed sci-fi environment. Central to the game are the X-Terra Citizens, depicting humans who escaped Earth following the 2404 cataclysm. These NFTs will serve as the primary characters, adding a unique layer of ownership and personalization to the gameplay.

Inside the game, will be also possible to make use of the XR-Droids NFTs, specialized automatons designed for exploration and resource gathering, enhancing the strategic depth of the game.
Context | XR-Droids Mini Game

In addition, the 2D game features a XR-Droids Survival mini-game, which can be accessed as a standalone (1st phase) and later through an in-game terminal inside X-Terraverse, offering additional challenges and rewards. This combination of elements will ensure a captivating and dynamic gaming experience.

This single player survival adventure in a 2D perspective will be difficult but at the same time with will offer rewards for the efforts. The prizes in question will feature XRDROID coins (XRPL). Access will only be allowed to XR-Droids holders as for the future farming game.

Contextually, the player will start from an easy level and as he progresses with the score, the difficulty will also increase. Enemies will become more and more aggressive and dropped items will be increasingly rare. It will be possible to collect items such as coins, vitality refills, special attacks, movement speed and fire rate boosters, bullet upgrades, and additional temporary weapons. The addition of bosses will be considered.
NFTs | X-Terra Citizens

The X-Terra Citizens are the humans that left planet earth with AlphaTech Corporation in search of a new home. Thanks to their great abilities they contributed to the activation of the XR-Droids on the new planet.

They will be **exclusively usable throughout the game**, where holders will have to survive in X-Terra planet by mining and gathering of resources, combat alien threats, plant seeds, cultivate crops, and build relationships with fellow colonists.

These characters will be available as NFTs and mintable in the near future through **different blockchains**. They will the primary **access key** to the game and will grant benefits correlated to the project. A **snapshot of XRPL holders** having at least 5 XR-Droids NFTs will be taken before the minting phase, granting 1 free mint to each XRPL detainer.

NFTs | XR-Droids

The XR-Droids are the automatons responsible for terraforming the X-Terra planet. These beings have been brought to life by the X-Terra Citizens, granting a new hope of survival through their support.

They will ensure an **additional experience** inside the game, where will be possible to send them to explore the vastity of X-Terra planet in search of resources and gain experience.

Initially, they will integrated inside a **standalone mini game and** later as automatons **into the 2D game** for carrying out extra activities for the colonists.

These droids are currently considered as XRPL exclusive but if necessary, or as previously requested by extra-blockchain holders, they will also come in other chains.

NFTs | XR-Droids Phygital Figures

With the term phygital, XR-Droids project is bringing something new into the real world with NFTs, making real life objects more unique 🏅 and valuable 💎

The entire collection, currently **registered on the XRPL**, will be associated with the future collection of 3D models, both digital and physical.

The models will be made available via the **merchandising store** that will be developed in the future. They will be obtainable only through the possession of XR-Droids NFTs and for each of them owned, only 1 replicated model will be made available.

Choose your favorite XR-Droid carefully! 👾
